Clay / UV Resin

#183 Ultraviolet Curable Resin
for both UV and LED Light UV Resin 25g
with Polishing Liquid 10g

Made by ultraviolet irradiation

under natural sunlight :
it takes about 30 minutes
under UV lamp :
it takes about 3 to 6 minutes
(The setting time depends on
the thickness of the artwork,
coloring, its situation like
weather and season)

#463 Injector for Ultraviolet Curable Resin (174×85×21mm)

Polishing liquid:

In general, the surface of artwork may be foggy by using mold which repeatedly used (3 to 5 times)
Polishing liquid helps the surface of your artwork have more brightness and transparency when the surface of your artwork is foggy.

Poly Clay

- Kato polyclay, the ultimate polymer oven-hardening clay
- Polymer clay for artists, by artists.;
- Minimal color shift from raw to cured clay
- Easy conditioning and handling

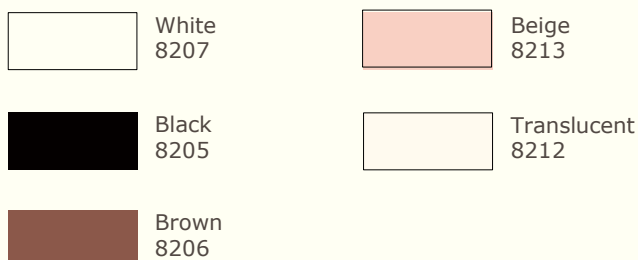

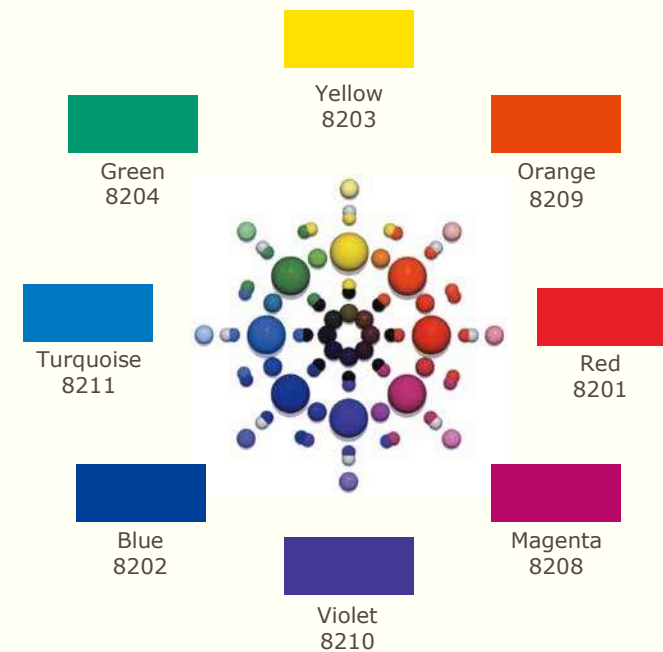

Donna Kato is a well-known polymer clay artist and teacher. She has written several books about polymer clay including "The Art of Polymer Clay." In addition to her many works, she has also released several instructional videos. With the help of Donna Kato, Van Aken International was able to create the ideal polymer clay; the first polymer clay by an artist, for an artist.

UV Resin

Cat. 1036

3D Curable Resin for both UV and LED Light, 25g

This item don't need polishing solutions
It is easy to make art works to be transparent without polishing

Feature:

♥ Irradiation time is short

♥ Easy to remove burrs

Made by ultraviolet irradiation
under LED light: it takes **about 1 minute**
under UV lamp : it takes **about 2 minutes**
(The setting time depends on the thickness of the artwork,
coloring, its situation like weather and season)

Because the burr is soft, it is easy to be deburring
